113 Cancri VII: a planet with very little free oxygen (only one very deep valley is habitable); one of the few planets where iridium can be found in such large concentrations as to make mining the substance practical, its population is primarily Vulcan; however, Starfleet Intelligence determined in 2270 that 5% of its population was actually Romulan (10-15% of the population is of Human stock); the planet is referred to as "Alcatraz" by its Human inhabitants due to the hardships they encountered there (the Humans arrived on the planet in the early 2200's); in 2267, the citizens of the planet tried to have the planet made independent from the Federation, but the Federation Council, under advice from Starfleet (which needed the iridium mined there), refused to grant them sovereignty; in 2269, the Romulans there discovered a temple to Gutremis, the Romulan god of the harvest; the Romulans began to sabotage mining operations; in 2270, the planet was given self-determination regarding its

sovereignty by an 89% vote of the Federation Council; the population voted overwhelmingly to have the planet declared "open" and completely neutral; it still provides a large portion of the iridium Starfleet needs while allowing the Romulans unlimited visitation rights so they can worship freely in the temple (source: "The Price of Peace" by Randall Landers, OAB)

Andorian zabathu: a large equinoid ridden by Andorians (source: "Pen Pals" by Hannah Shearer & Melinda Snodgrass, TNG2)

Andorians: from Epsilon Indi star system's planet Andor, a U.F.P. member race; physical description: blue-skinned insectoid bipeds with white hair and small knobbed antennae projecting from each side of the head; have dark, cobalt blue blood; there are three major sub-races: one has their antennae sprouting from the top of their foreheads, and a neon blue color; the second sub-race has their antennae from further back, and are a less brilliant shade of blue; the third sub-race has the antennae come forth from the crown of the head, and are very pale blue in color; the antennae in all sub-races move, usually as a reflection of their emotions; hair coloring can range from white to yellow, and in rare cases, orange; Andorians do not have a good vascular system, and rely on intramuscular injections for medication; slender in build, but incredibly strong, and possess some exoskeletal cartilage which makes injury from a conflict unlikely; can communicate over great distances (their antennae function as communication and sensory organs); general information: Andorians are an admittedly violent race, but they do not quarrel without reason; they do consider motivations of passion and power justifications for murder; they are the major arms manufacturers and exporters of the Federation; they are a race of "few sympathies" (the Andorian term for weaknesses), but one of them is for their families (which consist of four members); have thick sexual organs; have multiple partners in

their sex acts; they are not known for their charity; very musical people with soft voices; Andorians were never a sea-faring race (one could easily travel from island to island without leaving sight of either); history: more than one hundred thousand years ago, they fought a genocidal ("The Great War") war with the more-advanced marauders from the planet Triacus and wiped them out in a campaign which lasted over ten thousand years; ceremony: at the age of seven, in a rite of passage, each Andorian is given a series of implements with ceremonial and historical significance, most noted of these are the *k'frez* (a stiletto) and the *flabbjellah* (a combination of musical instrument and weapon which is carried by most males); Andorians can enter a "berserker" phase (indicated by glassy eyes and erect antennae) during which their physical abilities are heightened by 50%; commerce: Andorians are primarily regarded as experts in weaponry, although Andorian females are renowned for their translucent gowns; religion: very little is known of the Andorian religious practices; what is known is that the Andorian names for their God and their Eden-concept are unpronounceable; in the ancient past, Andorians created ceremonial stone rings; some Andorians consider Human females too liberated, and would not be beyond stoning a "liberated" Andorian female outside the gates of the hive-city as a heretic; Andorians understand that causing a loss of family pride can be a reason to kill oneself; mated females usually remain barefoot and pregnant and at home (source: "Journey to Babel" by D.C. anti-Hilbert space: the opposite of Hilbert space; this universe is an energy vacuum; exposure to it, via travel through a hole in space, results in the forceful extraction of energy from whatever is exposed; it was tapped in 2276 by Doctor Seth Knight; he used a field propagator to kill members of a competing science team by opening a portal to this universe around his intended victims (source: "*Ad Astra Per Aspera*" by Randall Landers, OAE)

anti-Hilbert space entity: an intelligent creature from the anti-Hilbert universe; it came into our universe by accident (it fell through the hole generated by Doctor Seth Knight's experiments); it was not believed to exist at first because Starfleet psychologists felt the creature was merely a manifestation of stress in the staff of BLB-0 BGN-5 brought on by the deaths of their colleagues; it was undetectable during the day because of all the equipment in operation; detected as an anomalous field propagation (source: "*Ad Astra Per Aspera*" by Randall Landers, OAE)

Littleford, OAB)

Arex: an Edoan male; Arex has no brothers or sisters (Edoans rarely have more than one child per family); Arex's ancestral line can be traced for three thousand years; before entering Starfleet as a technician, he spent ten years in the Federation merchant marine fleet; he has been in Starfleet for many years; during his service aboard the *Enterprise*, he was generally considered the best navigator in Starfleet; Edoans are long lived, and Arex knew from the very beginning that he wished to spend his long life in space; while Arex is an officer, and a good one, he is not a product of the Starfleet Academy; he worked his way up through the ranks, becoming an officer via a "field commission" during a battle involving the Klingons and the small cruiser aboard which he was then serving; all the officers were killed in the fray, and Arex took command to effect a temporary retreat and then a return action which took the Klingon ship by surprise and allowed Arex to disable her and bring her in to face Federation charges; while Arex never attended Starfleet Academy, he spent two years there some time ago as a space navigation instructor; one of his high scoring students was a young Russian named Pavel

Chekov; Arex is a quiet, efficient, officer, and has at least three decorations for bravery and has a Starfleet Citation for Conspicuous Valor; Arex himself would never mention them; when the mood is right, he can be persuaded to play a flute-like instrument native to his planet called a *sessica*, while the music may be lively or romantic or plaintive, all of it relates to story-songs which tell the history of his race or his family; Arex also can be persuaded...at very rare moments...to display a special proficiency in sleight-of-hand, a trick he picked up while in the merchant space service; with three hands, sleight-of-hand becomes very interesting indeed; from 2268 to 2270, as a lieutenant, and from 2273 through 2275, as the chief navigator of U.S.S. *Enterprise*; briefly in 2276, he served with Captain Jawalahara on the *Yorktown*, but after a few months, he transferred to the U.S.S. *Reliant* where he was the chief navigation officer until 2283; by 2292, he was Captain of U.S.S. *Repulse*; he attended the party celebrating Chekov's captaincy of the *Enterprise-B*; a few weeks later, he suffered two broken arms in the battle with the Tholians for Alpha Tucanae (source: publicity materials for *Star Trek: The Animated Series*; "Beyond the Farthest Star" by Samuel Peeples, TAS1; "A Klingon Holiday" by Randall Landers, OAD; "Ad Astra Per Aspera" by Randall Landers, OAE; *Liberation from Hell* by d. Arpinza: an Andorian colony world (source: “Scotty’s Vacation” by

Arret–Alternate Universe Humans: age backwards because of the flow of time there; you are born old and die as infants; because of the impracticality of this, it has been suggested (and generally accepted) that this world does not exist, and that the events of 2269 involving the *Enterprise* with this planet comprised some sort of test by an advanced alien intelligence (source: “The Counter-clock Incident” by John Culver, TAS2)

Arret–Energy Beings: the survivors of the catastrophe of Arret, they are disembodied intellects living in spheres, led by Sargon; only three of them survived, and they too soon joined their comrades in oblivion as the old temptations of absolute power corrupted one of them (source: “Return to Tomorrow” by John Kingsbridge, TOS2)
